

CITY OF MODESTO

WASTEWATER COLLECTIONS

**IX. SYSTEM EVALUATION AND
CAPACITY ASSURANCE PROGRAM**

DATE ISSUED: 4-6-09

DATE REVISED: 6-28-10

APPROVED BY: Gary DeJesus

In 2007, the City of Modesto adopted its Wastewater Collection System Master Plan. This plan takes advantage of new computer technologies and graphical data along with flow monitoring, rainfall data and any rainfall infiltration and inflow analysis to develop proper hydraulic models and capacity needs. This information is combined with various planning scenarios to identify sewer system deficiencies and drive the Sanitary Sewer Capital Improvement Program Plan. Excerpts from both the Master Plan Executive Summary and the Master Plan are included in this document in Appendix E. A full copy of our Master Plan is available on line at www.modestogov.com
